

The screenshot displays the Postman interface with a workspace named 'API Network'. The left sidebar shows a collection of environments, including 'Petstore V3', which is expanded to show a folder 'Store'. Inside 'Store', the endpoint 'GET Find purchase order by ID' is selected.

The main panel shows the request configuration for the selected endpoint. The method is 'GET' and the URL is 'https://petstore.swagger.io/v2/store/order/{{orderId}}'. The 'Body' tab is active, showing a message: 'This request does not have a body'.

The response section at the bottom shows a '200 OK' status with a response time of 600 ms and a body size of 452 B. The response body is displayed in JSON format:

```
1 {
2   "id": 9223372036854744184,
3   "petId": 2,
4   "quantity": 10,
5   "shipDate": "2024-10-24T12:34:08.460+0000",
6   "status": "placed",
7   "complete": true
8 }
```

The bottom status bar indicates the application is online and provides options for finding and replacing text, console output, and various toolbars like Postbot, Runner, Start Proxy, Cookies, Vault, and Trash.
