

The screenshot displays the Fiddler web debugging tool interface. The 'Live Traffic' tab is active, showing a list of captured HTTP requests. The 301st request is selected, showing a DELETE method to the URL `https://petstore.swagger.io/v2/store/order/922337203...` with a status of 200. The right-hand pane provides details for this request, including headers, cookies, and the raw request body. The request body is a JSON object with the following structure:

```
1 {
2   "code": 200,
3   "type": "unknown",
4   "message": "9223372036854775079"
5 }
```
