Type	Test
Performance testing:	
- Load testing	Check the behavior of the site under the load of 100,000 users at the same time
- Stress	Test at what number of simultaneous users the site will crash
- Recovery	Test the recovery of the site after a crash, so that the site recovers completely and that the site will recover on its own when the number of users is significantly reduced
- Volume	Check the speed of the site when the site is replenished substantially with goods and when there is a significant decrease in the number of goods on the site
- Scalability	Check the speed of the site when there is a significant increase in users and when there is a significant decrease in them
- Endurance	Check the behavior of the site under significant load for a long period
UI - User Interface testing	Check that all product images, regardless of category, have the same size and the same spacing between them
UX - User eXperience testing	Check that on the website it is possible to quickly order any product from the main page of the selected category without going to the product card
Usability testing	Check that the main information sections for ordering the product "Оплата", "Доставка", "Повернення", phone number, and mode of operation are placed in the header of the site
Configuration (Compatibility) testing	Check how the site works on other browsers: Microsoft Edge, Mozilla Firefox, Opera Mini, Safari
Portability testing	Check that the site starts and works without changes in Windows 7, Windows 10, and Windows 11
Localisation testing	Check that all informational sections placed in the basement (footer) of the site, when changing the language of the site, are translated accordingly
Internationalisation testing	There is no way to test - there are only two languages on the site: Ukrainian and Russian
Globalisation	There is no way to test - there are only two languages on the site: Ukrainian and Russian
Re-testing (Confirmation testing)	Check that after fixing the bug in the category "Чоловікам" with the selected filters: "тип товару - "Кросівки", "бренд" - "Nike", only sneakers on the page, no jackets
Smoke testing	Check that after making changes to the site, the site pages are loaded, the registration on the site is completed, the catalog and product search field works, and the product is added to the cart
Regression testing	Check that product filtering by all filter types works after adding product sorting functionality
Sanity testing	Check that after adding the product registration function, the basket works without changes, you can continue shopping from the basket, remove the product, or change the quantity of the ordered product
Install/Uninstall testing	There is no possibility of testing - a normal site, without an application
Security testing	Check that when you try to sign up with a single-character password, you get an error message and require a secure password
Accessibility testing	Check that the website has a voice guide and that all voice tracks have subtitles
Ad-hoc testing	Try to enter numbers in the fields "Ім'я", "Прізвище" and "По батькові" during registration
End-to-end testing	Check the loading of the site, user registration, product search using filters and sorting, adding to the cart and ordering the product, the user's account
